

CLEANING GREASE FOR BEARINGS USING XL-0715/002

XL-0715/900 is a solvent containing grease designed to loosen and rejuvenate bearings that have residual or dried **XL-0715/002**.

XL-0715/900 has been formulated with the same synthetic PAO base oil as the XL0715 to provide superior lubrication as it cleans bearings.

N.B. Due to the thixotropic and cleansing properties of the **XL-0715/900** certain precautions must be taken not to over lubricate bearings Apply **XL-0715/900 with the same equipment used for XL-0715/002**. Inspect bearings after lubricating and observe old grease as it is forced out and determine the 'cleaning' cycle. Use only enough **XL-0715/900** to clean bearing then return application to **XL-0715/002**

TYPICAL SPECIFICATIONS	
Product Code: XL-0715	/900
N.L.G.I. Grade:	1 – 1.5
Dropping Point (°C) (ASTM D-2265)	None
Melting Point (°C)	None
Copper Strip Test (163°C for 3 hours)	Negative
Texture	Soft / Adhesive
Colour	Yellow
Timken OK Load (kg) (ASTM D-2509)	22
Type of thickener	Silica
Oil Separation (24hrs @ 25°C) (ASTM D-1742)	N/A
Temperature Range (°C)	-17 to 399
Minimum Dispensing Temperature (°C)	-1
Solvent Type	Trichloroethylene

255 avenue Labrosse, Pointe-Claire, Quebec, Canada H9R 1A3
