

POLYON[®] FLUOROGRAPH[®] MOTOR OIL ADDITIVE

XL-0840 Fluorograph[®] is a super-concentrated oil additive formulated with a combination of P.T.F.E. (Teflon[®]) and a special colloidal graphite. These substances are amongst the most slippery and best anti-friction materials available.

XL-0840 is designed for use in internal combustion engines, enclosed gear systems, or other equipment requiring superior lubricant qualities.

XL-0840 contains a unique blend of “seal penetrants” that will “wet out” dry seals and help to reduce leakage.

XL-0840:

- Saves energy
- Prevents engine wear
- Prevents excessive oil consumption
- Adds unequaled slipperiness to any fluid
- Compatible with most engine oils and industrial lubricants
- May be used with any mineral- or synthetic-based motor oils in gas or diesel engines.

APPLICATION

Use 1 part **XL-0840 POLYON Fluorograph[®]** to 20 parts engine oil.

POLYON[®] and Fluorograph[®] are Registered Trademarks of Thermal-Lube Inc.
Teflon[®] is a Registered Trademark of DuPont.
