

## **HYDRALON®**

### **GEAR & HYDRAULIC OIL ADDITIVE**

**XL-0841** is a super-concentrated oil additive specially formulated to work with most hydraulic fluids. **XL-0841** uses a synthetic hydrocarbon, and is compatible with all mineral oils, as well as all synthetics that are compatible with mineral oils.

**XL-0841** contains a unique blend of “seal penetrants” that will “wet out” dry seals and help to reduce leakage. **XL-0841** provides the combined protection and friction-reducing properties of both graphite and Teflon® to save energy and reduce wear.

**XL-0841** is ideal for use in cars, trucks, heavy machinery, agricultural equipment, etc.

**XL-0841** protects against friction and wear, prevents dirt accumulation and the formation of varnish.

When used in proper dilution of 30:1, **XL-0841** will significantly lower the pour point of the base oil.

N.B.: **XL-0841** will instantly change the color of the oil to black.

**XL-0841** is not compatible with water- or glycol-based fluids.

Hydralon® is a Registered Trademark of Thermal-Lube Inc.  
Teflon® is a Registered Trademark of DuPont.
