

## **SYNTHETIC METALWORKING FLUID FOR NONFERROUS METALS**

**XL-5306** is a water-based metalworking fluid developed especially to provide excellent extreme pressure and corrosion protection for non-ferrous metals including: **aluminum, brass, bronze, copper and nickel.**

**XL-5306** provides anti-wear and lubricity characteristics and imparts good surface finishes to machined parts. In slide-way, drawing, and worm gear applications, **XL-5306** provides the necessary friction modification.

**XL-5306** can be used in the following processes:

- Threading
- Broaching
- Tapping
- Drilling
- Boring
- Milling
- Drawing
- Cutting

### **BENEFITS:**

- Excellent EP/antiwear properties
- Economical and versatile
- Environmentally acceptable
- Provides good surface finishes
- Non staining
- Excellent rust inhibition
- Odour free

**Application:** Dilute 1 part **XL-5306** to 7-9 parts water
